

## COLLABORATE WITH EXTERNAL PARTNERS FROM SHAREPOINT

**BusinessGuest**  
instant extranet

Getting ahead means harnessing & coordinating ideas from the best experts inside and outside your organization. But creating and securing high-performing collaborative digital work environments is the challenge of our time.

Our BusinessGuest solution lets users securely and easily manage collaborations and share files with externals directly within intranet collaboration spaces.

Use BusinessGuest on any SharePoint site to let internal users send documents or messages to external people (customers, partners, subsidiaries, ...), to track the reads, and to follow their replies or the document updates they send back.

### Advantages: Fast, Easy, Secure

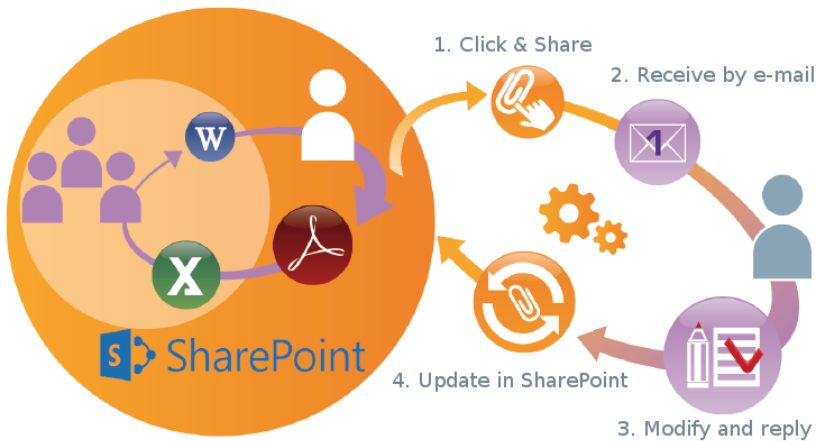

- The solution requires no change to existing your security policies
- Easily manage accounts of external people
- No technical prerequisite or training required for guest users
- Up and running in minutes
- Fixed and attractive pricing
- Compatible with the internal collaboration solution SocialFactor™

### Benefits

- Simple and secure exchange of documents with the outside
- Track interactions with external people
- Gain time and improve collaboration between internal and external people
- Fast deployment at unbeatable costs
